At the prompt:
Procedure: `go uvshow`

Some variables:

```
let ytype amp
let ytype weight
let xtype radius
let xtype time
let uvshow%fit no/yes
let uvshow%zero yes/no
let uvshow%track yes/no
```

At the prompt:

Procedure: `go uv_shift`

$$-2$$

-3

At the prompt:

Procedure: `go uv_map`

To plot*:*

Procedure: `go bit`

Some variables:

```
let type lmv
let type beam
let first 7
```

At the prompt:
Procedure: `go support`

Some variables:

```
let support%oneperplane yes/no
let support%kind cursor/ellipse/rect
```

At the prompt:
Procedure: `go clean`

Some variables:

```
let method hogbom/clark
let myclean%show yes/no
let myclean%support yes/no
let niter 1500
let ares 1e-3
```

To plot*:*
Procedure: `go bit`

Some variables:

```
let type lmv-clean
let first 23
let last 45
let type lmv-res
```

At the prompt:

Procedure: `go view`

Procedure: `go bit`

Some variables:

```
let type lmv-clean
let first 23
let last 45
let size 50
let spacing 3e-3
```
