

A horizontal sequence of 12 grayscale images showing the progression of a handwritten digit '4'. The images are arranged from left to right, showing a clear transformation from a noisy, pixelated, and somewhat blurry version of the digit to a clean, sharp, and well-defined version. The first image on the left is the most degraded, with significant noise and pixelation. As the sequence progresses, the noise is gradually removed, the edges become sharper, and the overall appearance of the digit becomes more refined and recognizable. The final image on the right is the cleanest and most legible version of the digit '4' in the sequence.
