The word "WORLD" is displayed in a highly stylized, pixelated font. Each letter is composed of individual pixels in various shades of gray, creating a dithered or halftone effect. The letters are bold and blocky, typical of early digital art or low-resolution computer graphics. The overall appearance is reminiscent of a vintage video game title screen or a retro-style logo.

A pixelated, black and white graphic of the text "WOW! WOW!". The letters are thick and blocky, with a jagged, pixelated edge. The exclamation marks are also pixelated and have a small dot. The overall style is reminiscent of early digital art or video game graphics.

A pixelated, grayscale representation of the text "The Great Wall of China". The characters are rendered in a blocky, pixelated font style, with varying shades of gray and black pixels creating a textured, digital appearance. The text is centered horizontally and occupies the middle portion of the image.
