

A horizontal sequence of 12 grayscale images showing the progression of a handwritten digit '4'. The images are arranged from left to right, showing a transformation from a noisy, pixelated version to a clean, sharp version. The first image on the left is the most noisy and pixelated. As the sequence progresses, the noise is reduced, and the digit becomes increasingly clear and well-defined. The final image on the right is the cleanest and most recognizable version of the digit '4'.

[illegible]
