A large, pixelated, black and white graphic of the letter 'P'. The letter is composed of many small squares, giving it a blocky, digital appearance. It is positioned on the left side of the page, with its vertical stroke extending from the top to the bottom, and its curved stroke starting from the middle and arching to the right. The background is white, and the letter itself is black with some gray shading to give it a three-dimensional effect.

A large, pixelated, black and white graphic of the number 4, rendered in a stylized, blocky font. The number is composed of many small squares, giving it a digital or retro aesthetic. It is positioned on the right side of the page, partially overlapping the right edge.

A 16x16 grayscale pixelated image of a stylized letter 'L'. The letter is composed of black and dark gray pixels, with some lighter gray pixels used for shading or as part of the design. The 'L' is positioned on the left side of the image, with its vertical stroke extending from the top to the bottom, and its horizontal stroke extending from the middle to the right. The overall style is reminiscent of early digital art or computer graphics.
