Resampled channel intensity (all weights):

$$T_{R'}(i) = \frac{\sum_{j=j_{\min}}^{j_{\max}} f_R(j) \times w_R(j) \times T_R(j)}{\sum_{j=j_{\min}}^{j_{\max}} f_R(j) \times w_R(j)} \quad (3)$$

The image shows a large, pixelated representation of the mathematical expression "9 =". The digit "9" is formed by a thick, dark stroke with a lighter gray outline, giving it a three-dimensional appearance. It has a curved top and a vertical stem. To its right is an equals sign, also composed of two horizontal bars with a similar pixelated, shaded effect. The entire graphic is set against a plain white background.

[illegible]

A pixelated, black and white representation of the word "PAPER". The letters are thick and blocky, with a jagged, pixelated edge. The 'P' and 'R' have a distinct shape, while the 'A' is formed by two horizontal bars and a vertical stem. The 'E' is a simple horizontal bar. The 'P' and 'R' have a small, dark, pixelated shape at the top, possibly representing a shadow or a decorative element. The overall style is reminiscent of early digital art or a low-resolution scan of a printed word.

1990-2010

A pixelated, grayscale image of the text "openworld". The letters are rendered in a blocky, pixelated style, with varying shades of gray and black pixels. The text is centered horizontally and occupies the middle portion of the image. The background is a light gray gradient.
