

A horizontal sequence of 12 grayscale images showing the progression of a handwritten digit '4' from a noisy, pixelated state to a clean, sharp state. The images are arranged in a single row, separated by small gaps. The first image on the left is the most degraded, with significant noise and pixelation. As the sequence progresses from left to right, the digit becomes increasingly clear and defined, with the noise being removed and the edges becoming sharper. The final image on the right is the cleanest and most recognizable version of the digit '4'.
